Budapest Criteria¹

	A - D must apply for a confirmed diagnosis of CRPS		Y
Continuing p	pain, which is disproportionate to any inciting event.		
The Patient	must report at least one <i>symptom</i> in <i>three</i> of the <i>four</i> following categories:		
Categories	Description	Y/N	
Sensory	Reports of hyperesthesia and/or allodynia		
Vasomotor	Reports of temperature asymmetry and/or skin colour changes and/or		
	skin colour asymmetry		
Sudomotor/	Reports of oedema and/or sweating changes and/or sweating		
Oedema	asymmetry		
			7
Motor/	Reports of decreased range of motion and/or motor dysfunction (weakness	,	
Motor/ Trophic	Reports of decreased range of motion and/or motor dysfunction (weakness tremor, dystonia) and/or trophic changes (hair, nail, skin)	,	
Trophic The clinician	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one sign * at the time of the evaluation in <i>two</i> or <i>more</i>		
Trophic	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one sign * at the time of the evaluation in <i>two</i> or <i>more</i>		
Trophic The clinician following car	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one <i>sign</i> * at the time of the evaluation in <i>two</i> or <i>mor</i> tegories:	e of the	
Trophic The clinician following car Categories	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one <i>sign</i> * at the time of the evaluation in <i>two</i> or <i>more</i> tegories: Description	e of the	
Trophic The clinician following car Categories	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one <i>sign</i> * at the time of the evaluation in <i>two</i> or <i>more</i> tegories: Description Evidence of hyperalgesia (to pinprick) and/or allodynia (to light touch	e of the	
Trophic The clinician following car Categories Sensory	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one <i>sign</i> * at the time of the evaluation in <i>two</i> or <i>more</i> tegories: Description Evidence of hyperalgesia (to pinprick) and/or allodynia (to light touch and/or deep somatic pressure and/or joint movement)	e of the	
Trophic The clinician following car Categories Sensory	tremor, dystonia) and/or trophic changes (hair, nail, skin) must observe at least one sign * at the time of the evaluation in two or more tegories: Description Evidence of hyperalgesia (to pinprick) and/or allodynia (to light touch and/or deep somatic pressure and/or joint movement) Evidence of temperature asymmetry and/or skin colour changes and/or	e of the
